MYCLEX MACHINING FLUIDS FILTERS

Mycelx Clean Tramp Oil out of Cutting and Machining Fluids

Myclex Filters easily Install in your Machining system return fluid Line to Remove Oil Discharge from escaping into the clean fluids reservoir. Works with automatic or manual systems.

Thermo-Plastic Machine Kleen Filter

- Extends Fluid Life
- Decreases Costly Fluid Changes
- Extends Tooling & Machine Life
- Decreases Machine Downtime
- Stops Messy and Dangerous Situations
- Increases Machining Quality

Patented design Removes Tramp Oil, Hydraulic Fluid, & Machine Oils
From Machining Fluids.

All HRM cartridges are engineered to remove hydrocarbons ranging from gasoline to oil from water in a single pass. HRM cartridges instantly solubilizes the PCB compounds and bonds them to its surface, keeping them from separating and emulsifying. HRM cartridges are also able to remove Sheen, Synthetic and Natural Oils, BTEX, PCBs, Chlorinated Solvents, and organically bound metals

Mycelx

For Semi-Synthetic and Mineral Oil Based Machining Fluid Tramp Oil Removal

Machine Kleen EB Cartridges are engineered to remove tramp oils from Semi-Synthetic and Mineral Oil(natural) machining fluids. These machining fluids typically emulsify and hide a percentage(1-10%) of the tramp oils causing heat transfer, quality, and lubricity issues. The EB cartridge instantly removes these emulsified tramp oils, but leaves the machining fluid package fully intact.

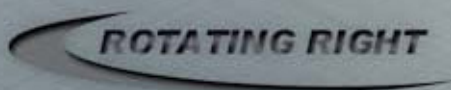

EB Filter

- Flow rate: 1-3 gpm
- Extends Fluid Life Dramatically
- Removes all Tramp Oils
- Increases Part Quality
- Decreases Machine Downtime and Costly Waste
- Dramatically Reduces Disposal Costs
- Decreases OSHA Hazards due to Exposure of Contaminated Fluid

The EB Filters are designed to fit standard 10" housings or standard 10" and 20" BB style housings.

All HRM cartridges are engineered to remove hydrocarbons ranging from gasoline to oil from water in a single pass. HRM cartridges instantly solubilizes the PCB compounds and bonds them to its surface, keeping them from separating and emulsifying. HRM cartridges are also able to remove Sheen, Synthetic and Natural Oils, BTEX, PCBs, Chlorinated Solvents, and organically bound metals
